| Preface | xi |
| Laurence CORROY and Christelle CHAUZAL-LARGUIER | |
| Author Biographies | xxv |
| Part 1. Stakes and Opportunities of Digital and Playful Devices for Patients, Caregivers and Care Providers | 1 |
| Chapter 1. The Use of Games as an Innovative Prevention Method for Discussing Work with Hospital Healthcare Staff | 3 |
| Julie PAVILLET and Aurélia DUMAS | |
| 1.1. Introduction | 3 |
| 1.2. Methodology of the research | 5 |
| 1.2.1. Collaborative research and participatory methodology | 5 |
| 1.2.2. Exploratory survey in the USLD: some elements of the organizational context | 7 |
| 1.3. The use of games as a method of occupational health prevention | 9 |
| 1.4. Results of the exploration and experimentation stage. | 11 |
| 1.4.1. Contributions of the game: gaps and displacements | 11 |
| 1.4.2. The game to approach the relational and affective dynamics within the construction of the caregiver and the work group. | 13 |
| 1.5. Conclusion and perspectives | 17 |
| 1.6. References | 18 |

| | |
|--|----|
| Chapter 2. The Digital Space as a Resource for Accessing an Alternative Discourse of Caregivers on Caregiving | 21 |
| Nathalie GARRIC and Frédéric PUGNIÈRE-SAAVEDRA | |
| 2.1. Introduction | 21 |
| 2.2. The caregiver: a suffering social figure whose status has recently been recognized. | 23 |
| 2.3. A digital field constructed in correlation with a reference corpus of caregivers' words | 25 |
| 2.4. Theoretical framework | 27 |
| 2.5. Some results | 29 |
| 2.5.1. The caregiver: an actor who receives little attention in the media and political arena | 29 |
| 2.5.2. A strong singularity of the digital corpus in a positive dimension | 32 |
| 2.6. Division and/or continuity of the caregiver status constructed by blogs. | 38 |
| 2.7. Conclusion | 43 |
| 2.8. References | 44 |
| | |
| Chapter 3. Co-design with Patients with Chronic Diseases for Information and Training Materials Related to Connected Implants | 47 |
| Ambre DAVAT and Fabienne MARTIN-JUCHAT | |
| 3.1. Introduction | 47 |
| 3.2. Co-design based on affect stories | 49 |
| 3.3. Application to the RealWorld4Clinic project | 51 |
| 3.3.1. Constitution of the group | 51 |
| 3.3.2. Course of the sessions | 52 |
| 3.3.3. Identification of issues through affect stories. | 52 |
| 3.3.4. Main questions and development of hypotheses. | 53 |
| 3.3.5. Development of the method. | 54 |
| 3.3.6. Review of the study's progress | 54 |
| 3.4. Assessment of the first phase of the study. | 56 |
| 3.4.1. Sample | 56 |
| 3.4.2. Patient profile/temporality in the adaptation to the disease | 57 |
| 3.4.3. Acceptance/rejection of implants. | 59 |
| 3.4.4. Sources of anxiety related to implantation | 60 |
| 3.4.5. Impact of telemonitoring on the care pathway | 60 |
| 3.5. Conclusion: co-design, one of the conditions for an ethics of innovation in health? | 61 |

| | |
|--------------------------------|----|
| 3.6. Acknowledgments | 62 |
| 3.7. References | 63 |

Chapter 4. Institutional Communication in Healthcare Organizations as a Marker of Patient Orientation: The Case of Institutional Websites 65

Corinne ROCHETTE and Emna CHERIF

| | |
|---|----|
| 4.1. Introduction | 65 |
| 4.2. Patient orientation, between culture and behavior. | 67 |
| 4.3. Methodology and research proposals | 70 |
| 4.4. Main results | 72 |
| 4.5. Discussion and conclusion | 75 |
| 4.6. Appendix: Terminology reminders | 77 |
| 4.7. References | 78 |

Chapter 5. Digital Communication and Merchandising for Caregivers: The Case of Thermal Baths 81

Christelle CHAUZAL-LARGUIER and Alexis MEYER

| | |
|--|-----|
| 5.1. Introduction | 81 |
| 5.2. The question of adapting the spa offer to a specific audience | 86 |
| 5.2.1. The caregiver: a legitimate target for the spa industry | 86 |
| 5.2.2. Short-term thermal care for caregivers in search of differentiating content | 89 |
| 5.3. The seduction strategy of caregivers in question | 92 |
| 5.3.1. The informational approach to communication is preferred | 92 |
| 5.3.2. Good referencing of the websites of thermal establishments is poorly exploited. | 95 |
| 5.4. Conclusion. | 98 |
| 5.5. References | 100 |

Part 2. Narrative Medicine and Patient and Caregiver Hermeneutics 103

Chapter 6. When the Doctor Becomes a Patient: The Relationship Between the Caregiver and the Breast Cancer Patient in *Demain nous appartient* 105

Laurence CORROY and Emilie ROCHE

| | |
|---|-----|
| 6.1. Introduction | 105 |
| 6.2. Narrative of the disease | 107 |

| | |
|---|-----|
| 6.3. Emotional journey of the patient physician | 109 |
| 6.4. The role of caregivers | 115 |
| 6.5. Conclusion | 123 |
| 6.6. References | 124 |
| Chapter 7. Taming Cancer. Affected Bodies, Mirrored Emotions and Challenges for Patients and Their Loved Ones | 127 |
| Anne VEGA and Ibtissem BEN DRIDI | |
| 7.1. Introduction – a limited recognition of the role of relatives? | 127 |
| 7.2. The invisible work of family caregivers in the care trajectory of the patient | 129 |
| 7.2.1. Memorizing and/or translating and coordinating consultations. | 130 |
| 7.2.2. Accompanying: trying to reduce anxiety, restoring image and dignity. | 131 |
| 7.2.3. (Re)building or unraveling relationships: limits to commitments | 133 |
| 7.3. The centrality and vitality of caregivers | 135 |
| 7.3.1. To have ties and networks of medical inter-knowledge | 135 |
| 7.3.2. Having administrative and financial assistance | 136 |
| 7.3.3. Behind the duty to support: helping keep morale up, social utility and trying to survive | 137 |
| 7.4. Conclusion – helping to maintain dignity and morale: another form of empowerment to be recognized. | 141 |
| 7.5. References | 142 |
| Chapter 8. About Long Illnesses. Family Caregivers: Actors and Producers of Care and Health. The Case of Algeria | 145 |
| Aicha BENABED | |
| 8.1. Introduction. | 145 |
| 8.2. Family help in the Algerian context | 148 |
| 8.3. Family help and secular care: an alternative to medical work | 150 |
| 8.4. The motivations for taking care of the sick relative | 156 |
| 8.5. The impact of care on the health of the patient’s relative | 157 |
| 8.6. Conclusion | 159 |
| 8.7. References | 159 |

| | |
|---|-----|
| Chapter 9. Affective Dynamics of Caregivers to Those with Alzheimer’s and Resilience. Self-(re)Construction through Two Devices: A Digital Platform and a Biographical Interview | 161 |
| Abdelhadi BELLACHHAB, Olga GALATANU and Valérie ROCHAIX | |
| 9.1. Introduction | 162 |
| 9.2. The biographical interview versus the discussion forum: two distinct devices of self-construction. | 163 |
| 9.3. Spaces of expression | 165 |
| 9.3.1. The forum, constrained freedom and conventional authenticity? | 165 |
| 9.3.2. The interview, a “position of social gaze” | 167 |
| 9.4. Theoretical and epistemological framework | 168 |
| 9.4.1. Definitions of concepts: affects, emotions and feelings | 170 |
| 9.4.2. Classes of emotions | 171 |
| 9.5. The emotional experience of caregivers through two communication devices | 173 |
| 9.5.1. Tool-based approach to the corpus | 173 |
| 9.5.2. The emotional experience reconstructed lexically in the forum. | 177 |
| 9.5.3. The emotional experience reconstructed lexically in the interviews. | 181 |
| 9.6. Conclusion. | 184 |
| 9.7. References | 185 |
| | |
| Chapter 10. Co-constructing a Territory that Provides Assistance | 189 |
| André SIMONNET, Julia GUDEFIN and Maya CHABANE | |
| 10.1. Introduction | 189 |
| 10.2. For a territory that helps caregivers: <i>Escale des aidants</i> | 193 |
| 10.3. A reflective approach in the sociology of action | 196 |
| 10.3.1. Workshops by and for caregivers as a research field | 196 |
| 10.3.2. Between tools and first results, what are the challenges of aid at the local level? | 198 |
| 10.4. Conclusion: what place for caregivers in the health and social systems? | 203 |
| 10.5. References | 206 |
